A. MOTION BY HON. GRACE NANCY MUTHAMI, MCA

Subjects: Mechanisms for affordable fertility care services

THAT, aware that under the Article 43(1) of Constitution 2010 provides for the right of every person to the highest attainable standard of health including the right to health care services, including reproductive health care; further aware that Part Two of the Fourth Schedule to the Constitution provides for the function of the County Governments which include provision of County health services and promotion of primary health care; acquainted that infertility is one of the key components of Reproductive Health, yet it remains an entirely neglected problem in Kenya whose main priority is to reduce the growing population size through Government and donor funded reproductive health programmes in support of contraception and population control, it is not surprising that Kenya has no provision for public fertility care; concerned that there are devastating consequences of infertility where childless couples face the most severe negative psychosocial consequences and childless women are frequently stigmatized, isolated, ostracized, disinherited and neglected by the entire family and even the local community, which amplifies the guilt and shame felt by the infertile individual resulting in polygamy and severe physical and psychological violence mitigated towards the woman, hence driving some infertile women to suicide; further concerned that most couples in Kenya who are struggling with unintended childlessness cannot afford in-vitro fertilization due to the high cost of Assisted Reproductive Technology services; noting that an affordable cost of Assisted Reproductive Technology would allow couples to seek fertility care early before age related ovarian factors affect favourable outcomes thus reducing the consequences accompanying childlessness among couples in the County, this Assembly urges the County Executive in conjunction with the National Government and other stakeholders to develop mechanisms to provide for affordable fertility care by integrating Assisted Reproductive Technology into the public Sector to give the much needed hope to the now hopeless couples struggling with involuntary childlessness.
